Summary

Proactive and adaptable Full Stack Developer with a strong foundation in backend engineering, web application development, and database-driven systems. Skilled in designing RESTful APIs, developing modern web applications, and applying technologies such as Next.js, NestJS, TypeScript, Prisma ORM, and cloud-based workflows. Experienced in building real-world software solutions, implementing system architectures, and collaborating across development teams. Seeking to leverage technical expertise and problem-solving skills to contribute to impactful software projects through a Full Stack Engineer internship.

Education Background

SMK Telkom Malang (Rekayasa Perangkat Lunak) - Ongoing

2024 - 2027

Organization

METIC Organization - Backend Engineer

2024 - 2026

Developed backend features for internal organizational projects while streamlining team collaboration through strict Git and GitHub version control workflows.

Projects

Nusa Cafe Finder - Full Stack Developer

June 2026 - Present

Designed and developed a full-stack web application to help users discover cafes based on personalized preferences, including Wi-Fi quality, power outlets, operating hours, and ambience. Built a decoupled architecture using Next.js and NestJS, integrated Google Maps Platform and Gemini AI for intelligent recommendations, implemented REST APIs, authentication, cloud storage, and optimized PostgreSQL database performance for scalable deployment.

Tech: Next.js, NestJS, TypeScript, PostgreSQL, Prisma ORM, Google Maps Platform, Gemini API, Tailwind CSS

Blockmaps - Frontend Developer

May - June 2026

Developed a responsive web application for commercial property mapping, enabling users to explore, filter, and manage location-based property data through an intuitive interface. Built reusable UI components using Next.js and TypeScript, integrated frontend services with backend REST APIs, implemented dynamic data visualization, authentication flows, and optimized user experience across multiple devices. Collaborated with backend engineers to ensure seamless API integration and maintain scalable frontend architecture.

Tech: Next.js, TypeScript, React, Tailwind CSS, REST API, Prisma Client, NextAuth, Cloudinary, Git

Teaching Factory SMK Telkom Malang - Backend Developer

April 2026 - Present

Collaborated in a three-person Agile development team to build backend services for an internal management system. Designed relational database schemas, developed RESTful APIs using NestJS and Prisma ORM, implemented authentication and authorization, optimized MySQL queries, and integrated backend services with the frontend to improve data consistency and application performance.

Tech: NestJS, TypeScript, Prisma ORM, MySQL, REST API, Git, Postman

Core Competencies & Skills

Software Development: Full Stack Development, Backend Development, RESTful API, Database Design, AI Integration

Technical Stack: TypeScript, JavaScript, PHP, NestJS, Laravel, Next.js, React, Prisma, PostgreSQL, MySQL

Cloud & Tools: Docker, Google Cloud Platform, Git, GitHub, Linux, Postman, DBeaver

Languages: Indonesian (Native), English (Intermediate)

Certificates

- Cisco Introduction to Data Science
- HackerRank SQL (Advanced)
- Cisco Introduction to IoT and Digital Transformation
- HackerRank REST API (Intermediate)
